CoolTouch Tube is one of the most elegant kiosks on the market. It is an obvious choice for spaces where maintaining an aesthetic interior is important. Sleek ergonomic design enables user to get closer to the kiosk, thus creating greater feeling of privacy.

Although noticeably slimmer, it is still robust enough to withstand vandalism. Streamlined modern design hides inside an industrial grade processor. Kiosk comes with very advanced software package, which includes secure browser and remote management module.

CoolTouch Tube offers you interactive self-service technology in one compact and flexible package making it the ideal choice for demanding customer service applications.
